Steven M. Bellovin

Percy K. and Vida L.W. Hudson Professor Emeritus of Computer Science

smb@cs.columbia.edu
https://www.cs.columbia.edu/~ smb

Education

1982 Ph.D., University of North Carolina at Chapel Hill. Dissertation: *Verifiably Correct Code Generation Using Predicate Transformers*; advisor: David L. Parnas.

1977 M.S., University of North Carolina at Chapel Hill.

1972 B.A., Columbia University.

Employment

2025–now Senior Affiliate Scholar, Institute for Technology Law & Policy, Georgetown University.

2025–now Percy K. and Vida L.W. Hudson Professor Emeritus of Computer Science and former affiliate law faculty, Columbia University.

2017–2025 Affiliate faculty member, Columbia University Law School.

2014–2025 Percy K. and Vida L.W. Hudson Professor of Computer Science, Columbia University.

2018-2019 On sabbatical, Center for Law and Information Policy, Fordham University School of Law

2016 Technology Scholar, Privacy and Civil Liberties Oversight Board.

2005–2014 Professor of Computer Science, Columbia University.

2012–2013 Chief Technologist, Federal Trade Commission.

2002–2004 Adjunct Professor of Computer Science, University of Pennsylvania.

2005–2012 AT&T, consultant

1998–2004 AT&T Fellow, AT&T Labs—Research.

1987–1998 Distinguished Member of the Technical Staff, AT&T Bell Laboratories and AT&T Labs—Research.

1982–1987 Member of the Technical Staff, AT&T Bell Laboratories.

1977–1978 Instructor, Dept. of Computer Science, University of North Carolina at Chapel Hill.

Honors

2026 Life Safety Alliance "Legend"

2023 Usenix Lifetime Achievement Award ("The Flame"), along with Matt Blaze and Susan Landau, for our "profound and lasting impact on Computer Science, Computer Security, Law, and Public Policy through their groundbreaking research, their influential publications, and their dedication to advancing knowledge that informs public policy."

2019 "Test of Time" award for Bellovin and Merritt, "Encrypted key exchange: Password-based protocols secure against dictionary attacks"

2016 ESORICS Outstanding Research Award

2016 EFF Pioneer Award (co-winner with the other authors of the "Keys Under Doormats" paper)

2015 J.D. Falk Award (co-winner with the other authors of the "Keys Under Doormats" paper)

2014 Elected to the Cybersecurity Hall of Fame

2006 Received the 2007 NIST/NSA National Computer Systems Security Award

2001 Elected to the National Academy of Engineering.

1998 Named an AT&T Fellow.

1995 Usenix Lifetime Achievement Award ("The Flame"), along with Tom Truscott and Jim Ellis, "for their work in creating USENET."

Major Committees

2023–now Member, National Academies Cyber Resilience Forum

2020–2022 Member, National Academies study committee on Fostering Responsible Computing Research: Foundations and Practices

2018–2020 Member, National Academies study committee on Safeguarding the Bioeconomy: Finding Strategies for Understanding, Evaluating, and Protecting the Bioeconomy while Sustaining Innovation and Growth

2013–2015 Member, National Research Council study committee on FAA Next Generation Air Traffic Control System

2012–2018 Member, National Research Council study committee on Cybersecurity Foundations

2010–2020 Member, Computer Science and Telecommunications Board of the National Academies

2009–2012 Member, Technical Guidelines Development Committee of the Elections Assistance Commission

2008	Co-chair, Applied Cryptography and Network Security (ACNS)
2006	Chair, Steps Towards Reducing Unwanted Traffic in the Internet (SRUTI)
2009	Subject matter expert, Department of Homeland Security Data Privacy and Integrity Advisory Committee
2005–2014	Member, Department of Homeland Security Science and Technology Advisory Committee
2004–2007	Member, National Research Council study committee on cybersecurity research needs.
2002–2004	Member, ICANN DNS Security and Stability Advisory Committee.
2002–2004	Security Area co-director, Internet Engineering Task Force (IETF).
2002	Chair, program committee, IEEE Symposium on Security and Privacy.
2002	Member, Information Technology sub-committee, National Research Council study committee on science and technology against terrorism.
2001–2003	Member, ACM Advisory Committee on Security and Privacy.
2001	Vice-chair, program committee, IEEE Symposium on Security and Privacy.
2001–2003	Member, National Research Council study committee on authentication technologies and their privacy implications.
2000–2002	Chair, IETF ITRACE working group.
2000	Co-chair, Usenix Security Symposium.
1999–2002	IETF representative, ICANN Protocol Supporting Organization
1999–2003	Co-chair, IETF SPIRITS working group.
1997–2001	Co-chair, IETF PINT working group.
1996–1998	Member, National Research Council study committee on information systems trustworthiness.
1996–2002	Member, Internet Architecture Board.
1996	Co-chair, Usenix Security Symposium.
1993–1995	Member, IETF IPng Directorate.

U.S. Patents

9,392,423 Enhanced communication service for predicting and handling communication interruption

8,798,614 Enhanced communication service for predicting and handling communication interruption

8,676,916 Method and Apparatus for Connection to Virtual Private Networks for Secure Transactions

8,261,069 Privacy-enhanced searches using encryption

8,239,531 Method and Apparatus for Connection to Virtual Private Networks for Secure Transactions

8,145,793 System and Method for Distributed Content Transformation

8,107,479 Method and System for Telephony and High Speed Data Access on a Broadband Access Network

8,037,167 Method for Detecting Hosts behind Network Address Translators

7,907,517 Routing Protocols with Predicted Outage Notification

7,756,008 Routing Protocols with Predicted Outage Notification

7,676,224 Enhanced Communication Service for Predicting and Handling Communication Interruption (2010).

7,558,970 Full-Text Privacy-enhanced searches using encryption

7,227,843 Method for reducing congestion in packet-switched networks (2007).

7,051,365 Method and apparatus for a distributed firewall (2006).

7,035,410 Method and apparatus for enhanced security in a broadband telephony network (2006).

6,870,845 Method for providing privacy by network address translation (2005).

6,665,299 Method and system for telephony and high speed data access on a broadband access network (2003).

5,958,052 Method and apparatus for restricting access to private information in domain name systems by filtering information (1999).

5,870,557 Method for determining and reporting a level of network activity on a communications network using a routing analyzer and advisor (1999).

5,805,820 Method and apparatus for restricting access to private information in domain name systems by redirecting query requests (1998).

5,440,635 Cryptographic protocol for remote authentication (1995).

5,241,599 Cryptographic protocol for secure communications (1993).
